

The Denver Design Challenge

Design a 2120 school uniform

What type of school uniform would your great, great, great grandchildren wear? One hundred years in the future life might be very different. Would people go to school on the moon? Would they have rocket packs? Would the uniform be very bright so children wouldn't get lost on trips? Would football boots appear when you press a button at playtime? What would you like in your dream outfit? Draw and label your ideas.
